

Dizzy Ducks!

Supplies needed:

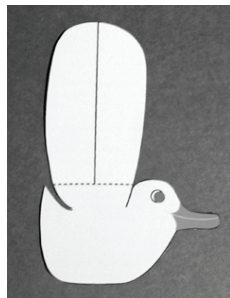

Scissors • Standard paper clip

1

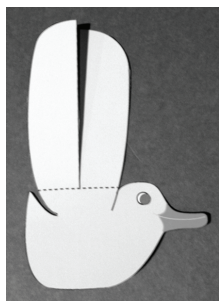

Print out onto cardstock.* Cut out the duck from the sheet.

2

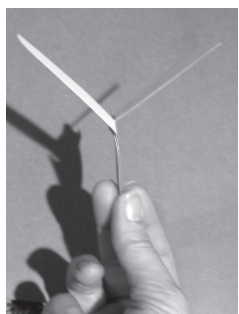

Cut out the duck, following the outside solid lines.

3

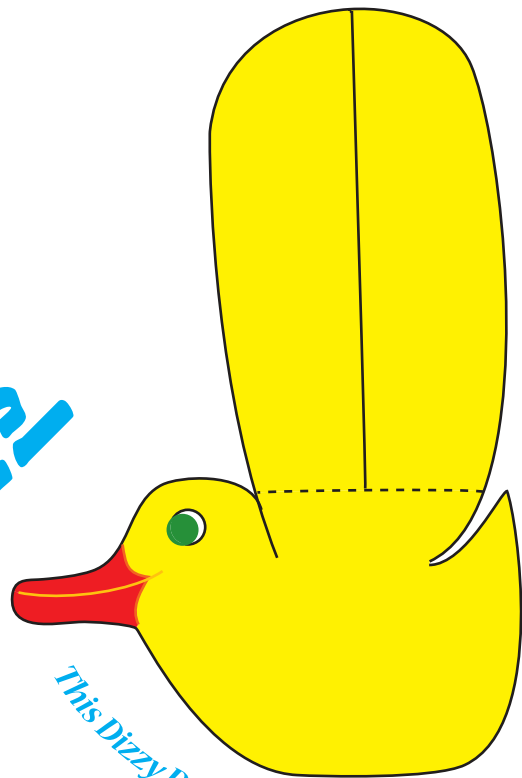

Cut down the solid line between the wings to separate them.

4

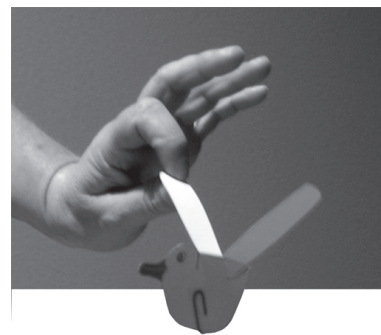

Fold down the wings on the dotted lines; one to the left, the other right. Angle the wings upward as shown.

This Dizzy Duck has a wacky, quacky flight!

5

Slide on the paper clip, angling forward as shown.

Now you're ready to fly!

Holding the duck by the tip of its wings, raise your hands and let it drop!

* You can print out a full color back of the duck by following the directions of your printer and using the back form. (It has no lines, so exact printing is not necessary).

Want to make a duck of it's own color?

Or do it for a group ?
